

A coordinate system with a vertical axis labeled $1/25$ and a horizontal axis labeled $1/250$.

The graph displays the progression of COVID-19 in the Veneto region. The green lines represent the number of active cases, which shows a steady decline from approximately 8,500 in March 2020 to around 4,000 in March 2021. The orange line represents the number of deaths, which remains relatively low throughout the period, with a notable increase in late 2020 and early 2021, peaking at over 900 deaths in late 2020.
